

[Podcast] The Pure Report Live at HIMSS 2019

The 2019 Healthcare Information and Management Systems Society (HIMSS) conference is in the books. The conference provided a perfect opportunity for over 45,000 healthcare professionals to collaborate on the latest innovations that are transforming that industry through information and technology.

One thing is clear: Artificial Intelligence is revolutionizing the Healthcare Industry, from enterprise imaging to genomics research to population health analytics. Machine-learning based applications and tools are driving the next generation of patient care innovation. With Pure Storage® solutions, you're ready for what's next.
