

Pure Storage Cisco Intersight FlashArray Connector - General Availability

Here at Pure Storage we've been working together in collaboration with Cisco for some time in developing storage integration for our FlashArray™ product line in Cisco Intersight.

Cisco Intersight represents a move toward cloud based management for IT infrastructure enabling centralized management of your Cisco Datacenter assets, regardless of their physical location. These types of management planes offer the ability to utilise Analytics/AI to simplify infrastructure operations and transform the way businesses support their IT investments.

Like with our own Pure1 Meta™; cloud based management tools are used to consolidate and analyze large data sets securely collected from all of our customer arrays. This provides the ability to gain meaningful insight from the collected data that can then be shared back to customers in a simple way to enable more informed decisions when managing infrastructure. These can include:

1. Predicting resource consumption/growth to simplify capacity planning activities
2. Simulating workload placement to better understand and improve asset utilization
3. Understanding the resource requirements of new applications before actual deployment.

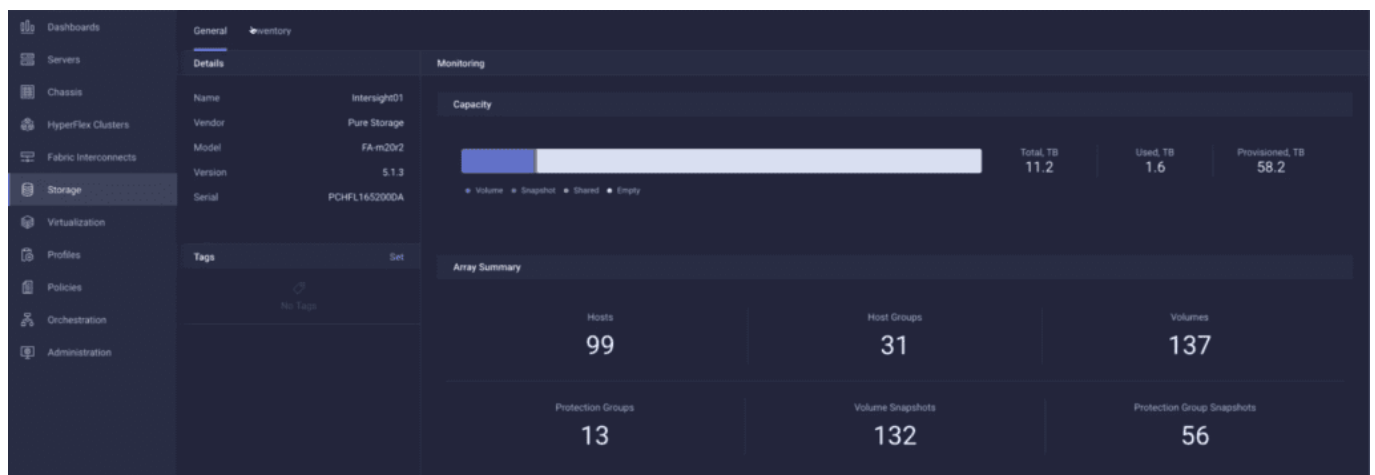

The mission here is to combine these benefits into the management stack to allow [FlashStack](#) customers to simplify the operational management experience of their Cisco and Pure products together.

So it's great to be able to announce the first step in this integration with the GA release of our FlashArray Connector! In this post let's review the features offered in this release and also provide details on the license changes in Cisco Intersight:

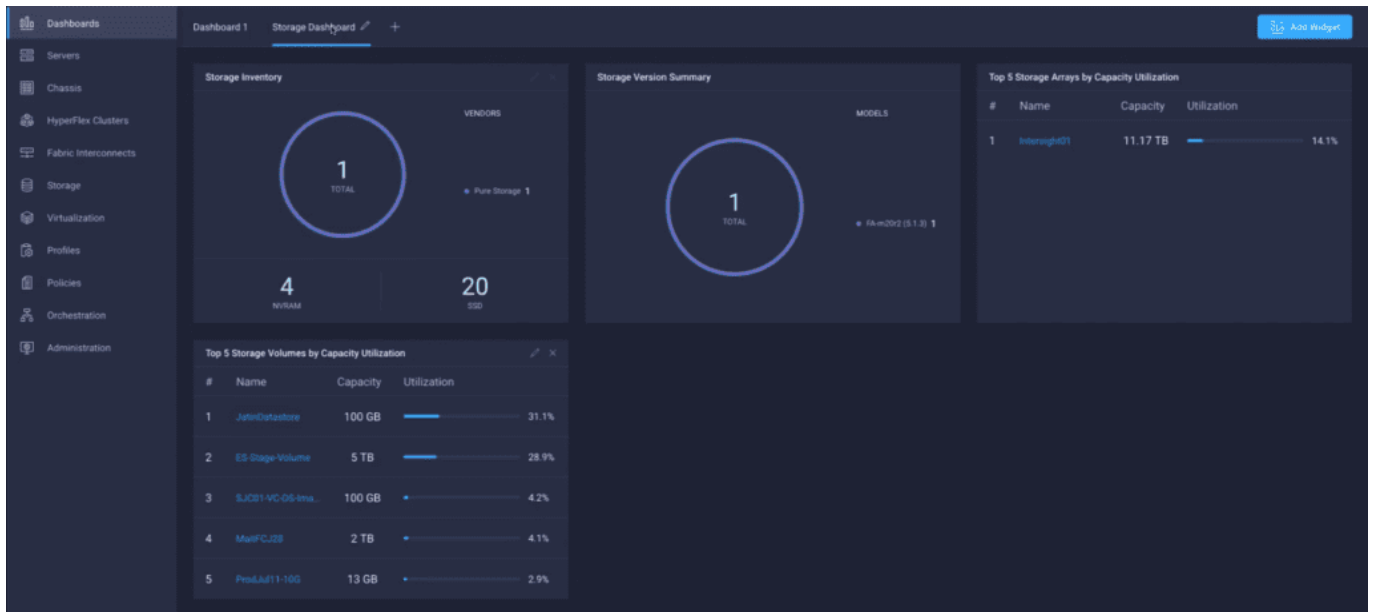

Pure Storage FlashArray Connector Features at GA

As part of this initial GA release, Cisco Intersight enables the following Pure Storage FlashArray management capabilities using Intersight Assist:

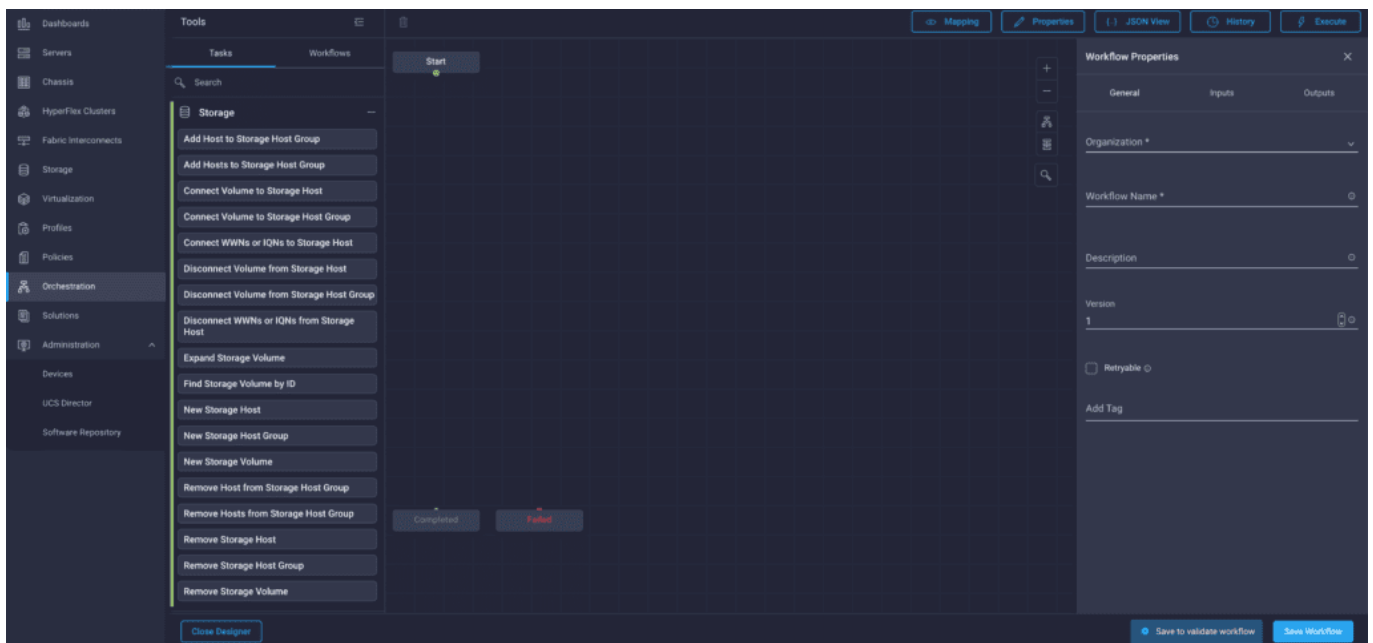

- View general and inventory information – You can view storage device inventory (including FlashArray hardware and Purity software).

- Add storage device related widgets to a Dashboard – You can add and rearrange widgets related to storage devices including capacity and inventory information.

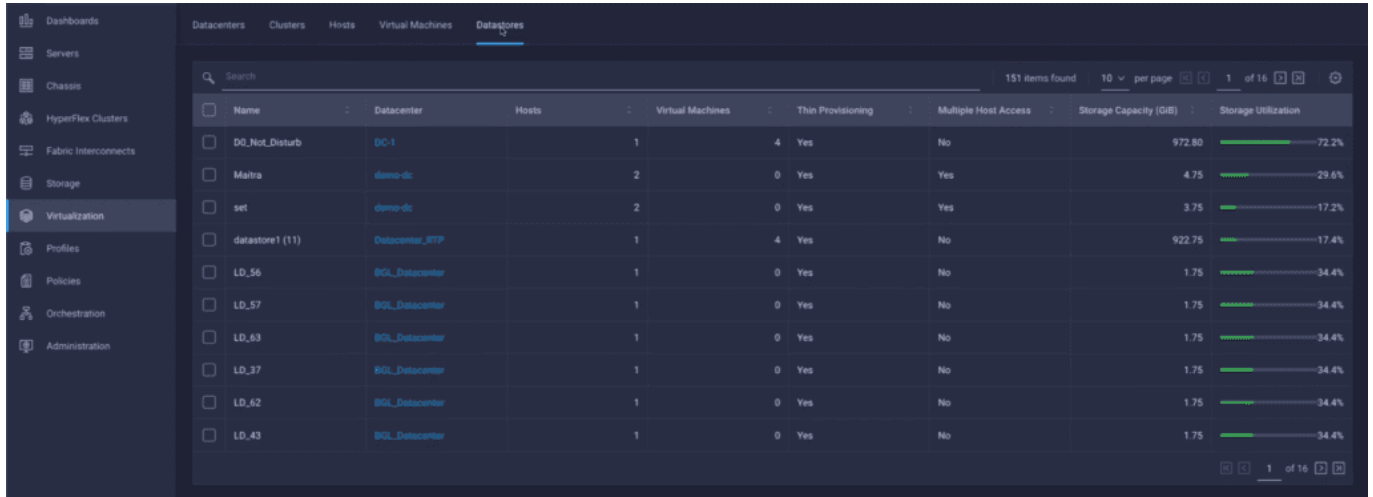

- Run workflows – Using the workflow designer you can create and execute your own workflows manipulating storage and other infrastructure components together to automate initial deployment/ device reconfiguration.

VMware vSphere vCenter Features at GA

Cisco Intersight also enables you to claim VMware vSphere vCenter devices using Intersight Assist providing the following integration:

- View general and inventory information pertaining to VMware vSphere vCenter – You can view Datacenters, Clusters, Hosts, Virtual Machines and Datastores.

Name	Datacenter	Hosts	Virtual Machines	Thin Provisioning	Multiple Host Access	Storage Capacity (GiB)	Storage Utilization
D0_Not_Disturb	DC-1		1	4 Yes	No	972.80	72.2%
Maitra	demo-dc		2	0 Yes	Yes	4.75	29.6%
set	demo-dc		2	0 Yes	Yes	3.75	17.2%
datastore1 (11)	Datacenter_1TP		1	4 Yes	No	922.75	17.4%
LD_56	BGL_Datacenter		1	0 Yes	No	1.75	34.4%
LD_57	BGL_Datacenter		1	0 Yes	No	1.75	34.4%
LD_63	BGL_Datacenter		1	0 Yes	No	1.75	34.4%
LD_37	BGL_Datacenter		1	0 Yes	No	1.75	34.4%
LD_62	BGL_Datacenter		1	0 Yes	No	1.75	34.4%
LD_43	BGL_Datacenter		1	0 Yes	No	1.75	34.4%

- Run workflows – Like Pure Storage FlashArray you can use the workflow designer to deploy/configure VMware vSphere components.

Cisco Intersight License Changes

This GA release also includes changes to the Cisco Intersight Licensing tiers based on the Pure Storage integration features for FlashArray:

Intersight Licensing Model for Pure Storage Integration

Cisco Intersight Licensing Tiers - Features

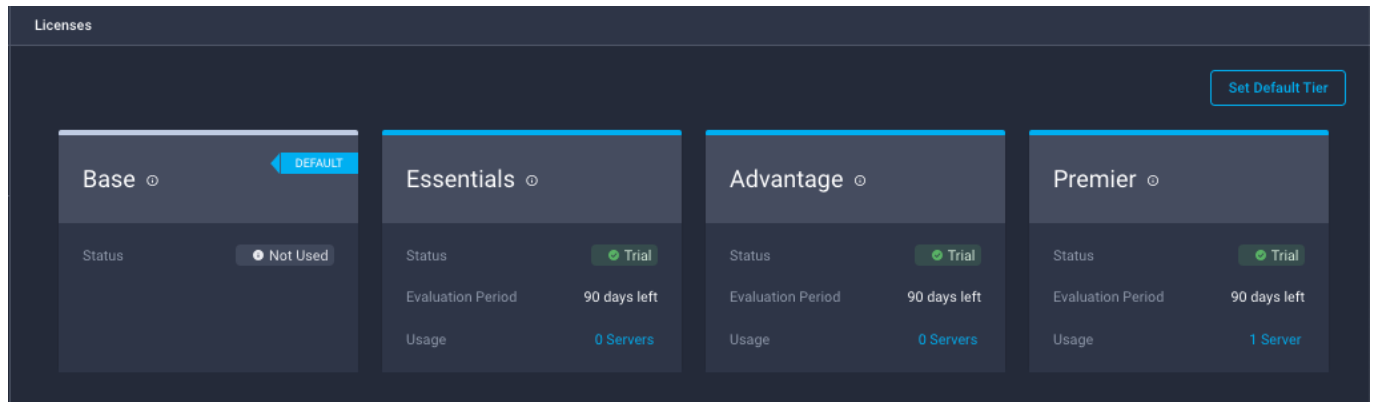

Base	Essentials	Advantage	Premier	Pure Storage Integration Requirements:
<ul style="list-style-type: none"> SaaS only No cost for UCS and HyperFlex systems Global monitoring of health and inventory status User customizable dashboard Tagging and basic search Context launch of element managers (UCS Manager, IMC, HyperFlex Connect, and UCS Director) Simplified Cisco HyperFlex installation and upgrades Connected TAC: Log Collection, Open Case, Contract Status Role Based Access Control, Single Sign-On (SAML), Multi-Factor Authentication 	<ul style="list-style-type: none"> All the features of Base SaaS and Virtual Appliance Advanced global search and detailed inventory Server HCL compliance check with driver Recommendations Virtual Keyboard-Video-Mouse (vKVM) ServiceNow Integration Cisco Intersight Mobile App HX Storage Capacity Planning (in Tech Preview) Cisco Standalone UCS C-Series management (M4 and later) Policy-based configuration with Profiles Firmware and server actions (Power On/Off, reboot, etc) Includes UCS Central and IMC Supervisor 	<ul style="list-style-type: none"> All the features of Essentials SaaS and Virtual Appliance Tunneled Virtual Keyboard-Video-Mouse (vKVM) (Target Q1,CY2020) Storage Widget for Pure Storage (Target Q1,CY2020) Storage Inventory Status for Pure: Capacity and Utilization Storage (Target Q1,CY2020) Multi-Domain Inventory correlation: Server, Virtualization, Storage (GA: Target Q1,CY2020) OS Install (in Tech Preview , GA: Target Q1,CY2020) HX Edge + SD-WAN (Tech Preview Target Q1,CY2020) 	<ul style="list-style-type: none"> All the features of Advantage SaaS and Virtual Appliance Includes UCS Director Storage Automation with Pure Storage (Target Q1,CY2020) VM Automation (Target Q1,CY2020) Workflow Designer (Tech Preview Target Q1,CY2020) 	<p>Pure Storage Integration Requirements:</p> <p>Advantage Storage Widgets and Inventory Status (Capacity/Utilization).</p> <p>Premier Storage Automation.</p>

For more details on Cisco Licensing tiers and associated features, please refer to

the [Cisco Intersight Data Sheet](#).

The good news is that the 90 Day trial covers all tiers, so you can still try out the latest features before purchasing licensing from Cisco:

Final Word

Look out for further collaboration with Cisco on Intersight, I'll be [focusing more posts](#) on the various integration and how you can get the best out of them along with workflows covering more use cases!

As of writing this post, it's important to know that while Cisco Intersight fully supports the management of C-Series UCS servers it only supports monitoring of B-Series UCS Servers. Look out for a future release later this year extending the same capabilities to B-Series UCS Servers.
