

Creating Volumes from Protection Group Sources (Part 1)

Below is an example using the PowerShell SDK . The below has also been added to the new [Microsoft Platform Guide PowerShell](#) section.

```
[crayon-6515c8481c741210566551/]
```

Output example:

```
[crayon-6515c8481c74b116811443/]
```

Hope that helps,

Barkz
